

## CERTIFIED COMMODITIES TRADER

### INTRODUCTION

Commodities markets in India have come a long way in becoming the second most traded exchange-traded-products after equity markets. Internationally it is highly robust market with diversified product portfolio to trade in. Indian economy being one of the largest producer and/or consumers of commodities, both agri and non-agri, commands a high degree of influence on the global commodities price trend. Hence, there is a high relevance of commodities markets in India. The market offers variety of trading opportunities for all class of market participants. A right knowledge bank of the same will help to realize the true value from the growth of this market.

### CONCEPT

Trading in commodities markets is an acceptable occupation in International markets. Exchanges like Chicago Board of Trade (CBOT), New York Mercantile Exchange (NYMEX) and Chicago Mercantile Exchange (CME) offers very strong trading platform and opportunities for full time traders. With Indian exchanges like Multi Commodities Exchange of India Limited (MCX) and National Commodities and Derivatives Exchanges (NCDEX) witnessing a phenomenal growth in last 5 years, the opportunities have multiplied. The global financial market is witnessing a paradigm shift with technical, practical and relevant knowledge emerging as the primary keys. With highly globalized and integrated world economics, there is a strong need of understanding the relationship between various asset classes.

Commodities are very important asset class and knowledge of the same is very important to complete the understanding. CCMT is an endeavor which promises to add quality towards such learning by providing:

- Learning from market professionals and industry experts
